

**Present  
your research  
capabilities  
to the world's  
leading mineral  
companies**

Forge a link with AMIRA International, the industry's partner of choice for collaborative research

# Why we are the industry's partner of choice for collaborative research

AMIRA International has grown to be the partner of choice for both companies and researchers because we have

- A global network of industry-specialist research institutions
- Global access to member funding for suitable research projects
- Proven systems and experienced people for managing the collaborative process
- A global network to provide direct contacts for researchers and companies

## Capacity building

It is a measure of our success that some research institutions have been continuously involved with AMIRA projects for more than 40 years.

Through such sustained support we are able to help our partner research institutions grow to regional or global centres of excellence.

# Value of being a research provider to AMIRA International

## **1 Access to industry support for large scale projects**

AMIRA International is able to put together multi-client support packages, often backed with in-kind assistance and Government or institutional support.

## **2 Ownership of project IP**

Researchers generally own the IP derived from projects with agreed levels of usage by sponsoring companies.

## **3 Development of centres of excellence**

AMIRA's enduring programs, often involving collaboration with international researchers, can foster your development as a national, regional or global centre of excellence.

## **4 Management facilitation**

AMIRA has proven best-practice processes to coordinate industry input and recognition of collaborative research.

## **5 Career-path development**

AMIRA-supported projects assist in development of graduates and post graduates as a future staff resource.

If you are interested in working with AMIRA International contact your regional AMIRA office.

# About AMIRA International

AMIRA International is an association of the world's minerals companies and their suppliers.

Its function is to develop, broker and facilitate collaborative research projects that strengthen members' businesses.

We currently have US\$50 million of research in progress at universities and research institutions.

## **We do this by:**

- Maintaining the world's biggest network of quality research providers
- Identifying R&D opportunities anywhere in the world that may hold value for member companies
- Developing project proposals to seize these opportunities
- Generating funding support for this research through member sponsorships
- Pursuing other forms of support (grants etc)
- Overseeing these projects so that members gain the expected benefits
- Supporting research infrastructure
- Providing a forum where industry R&D specialists and researchers can network
- Where appropriate creating partnerships between several research institutions in order to create teams with world-class expertise across several disciplines

## **Fields of research include:**

**Geoscience**

**Mine Engineering**

**Mineral Processing**

**Extractive Metallurgy**

**Sustainability**

**Multidisciplinary** research spanning more than one of these fields
